QA/QC Engineer building a long-term career in QA automation, hands-on with Playwright, TypeScript/JavaScript and Selenium alongside manual testing. End-to-end, API and regression testing wired into GitHub Actions CI; SQL state validation. Scored 93% on FPT Software's technical assessment (100% on Unit & Integration Testing, SQL and coding) and B2 English.

Core Competencies

- **Manual QA/QC:** test scenario & case design (happy-path, edge, negative, error handling), acceptance-criteria based testing, defect reporting & tracking (severity/priority)
- **Test Automation:** Playwright/TypeScript, Selenium (Java), Postman (collections + assertions); functional, unit, integration, API, E2E and regression testing
- **API & Data Testing:** REST API validation, HTTP/JSON, JWT/auth-flow and RBAC/permission-boundary testing; SQL state verification (MySQL, PostgreSQL)
- **Programming & Tooling for testing:** Java, JavaScript/TypeScript, Go; GitHub Actions CI, Git, Docker, Jira; Claude Code & MCP for AI-assisted test design

Professional Experience

- **Công ty TNHH Thiết bị Y tế MVMED** **Ho Chi Minh City**
QA Engineer Intern *Apr 2026 - Jul 2026*
 - Designed and executed test cases across 8 REST API modules (customers, products, equipment lifecycle, repair tickets, inventory, maintenance scheduling, quotations), covering happy-path, edge, negative and error scenarios and validating schema, status codes and business logic against requirements
 - Validated RBAC and authentication flows across user roles to catch unauthorized-access edge cases; wrote SQL to confirm data integrity after write operations
 - Built Postman collections with assertions and integrated automated tests into a GitHub Actions CI pipeline for regression coverage on every build; logged and tracked defects with clear reproduction steps, severity and priority

Projects

- **Academic Project** **Selenium, Postman, SQL**
RadicalCare – QA & Test Automation *2024 - 2025*
 - Wrote Selenium E2E scripts and Postman collections with assertions for 12 endpoints, catching 3 authentication edge cases missed in manual review; validated database state with SQL

Education

- **HUTECH University** **Ho Chi Minh City**
Bachelor of Software Engineering *2022 - 2027*

In progress, expected 2027. OOP, backend/API development, databases, software testing, system integration.

Languages, Assessments & Awards

- **Languages:** Vietnamese (native); English B2 independent user (preparing for TOEIC, target 800+).
- **FPT Software Talent Assessment** (2026): 93% technical (Proficient) with 100% on Unit & Integration Testing (Postman, JUnit), SQL & Database, and coding; English B2 (Writing C1, Speaking B2, Reading 81%). [\[certificate\]](#)
- **Award:** Young Talent Award, IT GOT TALENT Competition, HUTECH University. **Program:** FCJ Amazon (AWS EC2, S3, IAM).
